

OVERVIEW

ARTIFICIAL INTELLIGENCE (AI)

Generative AI gives you the ability to extract, analyze, and act on data from documents faster than ever with natural language questions and answers – turning insights into strategic business moves. AI-powered automation helps organizations digitally transform, turn complex information into actionable insights, and make smarter, more-informed business decisions.

AI CREATES INTELLIGENT AUTOMATION SOFTWARE

Artificial intelligence (AI) is changing the way every business works in every industry, and – contrary to popular opinion – it's augmenting human potential, not replacing it. AI-powered automation helps organizations digitally transform, turn complex information into actionable insights, and make smarter, more-informed business decisions.

ALL STAR
SOFTWARE SYSTEMS

Drive growth and innovation across your organization with automation and AI. All Star is here to help you realize transformation from your AI tools.

REVOLUTIONIZE PRODUCTIVITY AND DECISION-MAKING WITH AI

AI-powered workflow automation solutions include intelligent document processing, low-code process orchestration, robotic process automation (RPA), and other advanced AI-based tools to improve your productivity and customer engagement. Generative AI gives you the ability to extract, analyze, and act on data from documents faster than ever with natural language questions and answers – turning insights into strategic business moves. Use automation and AI to reduce human involvement in repetitive, routine tasks so humans can devote their time to high-value work.

HERE'S WHAT'S POSSIBLE WITH AI:

REIMAGINE YOUR DOCUMENT WORKFLOW WITH DOCUMENT AI

Document automation solutions that incorporate AI speed up and simplify document processing so you can turn mountains of paperwork into actionable insights. Software from vendors like Tungsten Automation and Hyland Software capture, process, store, and retrieve unstructured documents and places all of this information at your users' fingertips in simpler ways like never before. You'll eliminate time-consuming processes that require human attention and see faster time-to-completion – resulting in happier customers. Document AI not only cleans up documents to improve the content within but also engages machine learning technology to assist in extracting data elements necessary for hands-free transaction processing.

IMPROVE PRODUCTIVITY WITH GENERATIVE AI

Generative AI uses natural language models to augment your development capacities and better gather insights from content. Generative AI helps end users generate text, summarize content, and infer meaning, you get more done, faster. Generative AI-powered software helps your developers turn sketched ideas into actionable workflows and data models to innovate faster without needing advanced levels of proficiency or custom coding.

OVERVIEW

MAKE SMARTER DECISIONS WITH DECISIONING AI

Decisioning AI mitigates risks by supporting risk assessment and anomaly detection. With predictive analytics, decision-makers can make strategic business moves based on real data provided to them versus hunting through documents and data manually. Decisioning tools provide clear yes/no answers – along with numbers to support those determinations – while generative AI provides the content explaining the answer.

INCREASE OPERATIONAL EFFECTIVENESS

Intelligent automation users report as much as a 55% increase in operational effectiveness and achieve measurable results like higher employee and customer satisfaction, cost savings, and business agility. Organizations use AI to transform financial processes from slow, manual work to nimble, real-time information exchange. With AI taking care of data extraction and analysis from documents, you no longer need to commit humans to unlocking value from content.

EASY INTEGRATION

AI-powered tools integrate data and workflows across your business to connect existing infrastructure to your new AI capabilities. You can further drive automation by connecting internal and external business processes, legacy systems, mobile devices, and more with AI. Using your data and documents, AI technology can provide answers specific to your business and eliminate the manual efforts to capture, store, retrieve and process transactions.

DISCOVER THE POWER OF AI

Drive growth and innovation across your organization with automation and AI. All Star is here to help you realize transformation from your AI tools. Get in touch today to learn more.
